DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of the figure 2 embodiment in the paper filed 16 October 2003 is acknowledged. The traversal is on the ground(s) that a search for one of the species would encompass a search for the remaining species and thusly the search and examination of the entire application could be made without serious burden. This is not found persuasive because a search of the particular connecting embodiment elected may or may not encompass the same search, in particular with respect to the connection art. Further, the search and examination of all the embodiments would be burdensome. If a generic claim is found allowable, applicant will be entitled to consideration of all claims that properly depend therefrom.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, line 6, there is no antecedent basis for "the connecting shaft end portion".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Besnard (U.S. patent 3,576,044).

The patent to Besnard discloses the invention as is claimed. Note figures 2 or 5 which show a wiper arm (1) with a groove (5,6), a connecting shaft (12) provided on a blade (2) and having chamfered portions (13) for detachably and rotatably coupling with the arm via the groove. The attaching groove is provided with an inner portion (6) having a larger diameter than the connecting shaft and a groove entrance portion (5) having a width narrower than the groove inner portion. Such components allow for detachment of the arm from the blade upon the proper orientation of the chamfered portions with the groove.

Allowable Subject Matter

Claim 2 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 3, 7 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

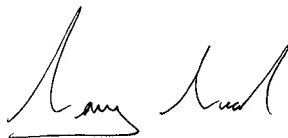

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
